Introduction

A to Z Drug Facts was developed with the health care provider in mind. It is designed to provide vital drug information in a format that is easy to understand and readily accessible. *A to Z Drug Facts* contains many full drug monographs, plus abbreviated monographs for combination drugs, orphan drugs, and AIDS drugs in development. Each monograph covers pharmacology considerations and patient care considerations.

Monographs are organized alphabetically by generic drug name. Consistent sections are used to create a visual roadmap to help navigate the information. The standard format used throughout the book makes the information clear and easy to find. The following description outlines what is in each category.

Monograph Organization

Pharmacology considerations: Each monograph contains detailed drug information. The following sections are included:

Drug Name: Generic drug name and common synonyms are listed in each monograph header. A slash between drug names indicates a combination product.

Phonetic Pronunciation: A guide is provided for generic drug names. Pronunciations for commonly used terms, such as acid, have not been given. The pronunciations are based on the USAN Council's officially designated pronunciations. The syllable in capital letters receives the emphasis.

Class: Drug Facts and Comparisons® drug classification is used. A slash separates two equal therapeutic classes (eg, Cardiovascular/Antineoplastic).

Trade Name: US trade names are listed for each drug along with doseform and strength. Common Canadian trade names are provided whenever possible following the list of US names. A maple leaf appears at the beginning of the Canadian list. If a trade name is available in the United States and Canada, it appears under the US list only.

Leadership in Psychiatry

Authors: Dinesh Bhugra
Pedro Ruiz
Susham Gupta

Publication Information: Chichester, West Sussex : Wiley-Blackwell, 2014

Resource Type: eBook.

Description: The psychiatric profession must ensure that its next generation of leaders has the appropriate skills to provide mental health services in the face of globalization and urbanization, new technologies, and competing demands for shrinking resources. Developing leadership skills and leaders is critical in order to optimise the use of resources, their application, service planning and delivery of services for patients and their families. This is the first book on leadership (rather than management skills) to focus on psychiatry and mental health care. Contributions from international experts with clinical and non-clinical backgrounds pull together the theories and practical skills required to be a successful leader. The aim is to guide mental health professionals in general and psychiatrists in particular on how to gain the relevant skills and on how to utilise these skills and training to take on leadership roles in clinical and organisational settings. The book covers the role of the leader and the skills required for leadership, including chapters on communication, decision-making, team development, mentoring, gender issues in leadership, burnout and stress, mindfulness practices as assessment tools and learning material. Essential reading for all those who aspire to lead.

Conclusion

- L'ensemble des livres électroniques de l'Institut est accessible via notre catalogue santécom.
- Nos livres électroniques sont consultables sur 2 plateformes : OVID, EBSCOhost.
- Les 2 plateformes permettent de sauvegarder, imprimer, transférer une partie du livre.
- OVID permet l'accès non restrictif : nombre illimité de personnes peuvent consulter spontanément le même livre.
- Pour l'instant, nous avons choisi l'accès à un usager seulement chez EBSCOhost : il faut que le lecteur ferme l'interface de lecture pour libérer le livre aux autres usagers.
